

Rules

Turns

- The order of turns will start from Italy and do a coin flip, go clockwise for head and counterclockwise for tails.
 - Every round the order would be reversed
1. Gain gold (national treasury points), population and weapon from your cities and factories
 - Cities produce +5 gold and +1 population per turn.
 - Factories produce +1 weapon unit per turn.
 2. Use the leader's / territorial abilities.
 - Passive abilities are always working
 - Active abilities have to be triggered;
some abilities have costs that you have to consume something to trigger;
some other abilities have Cooldown written as CD which means you can't use the ability for a certain number of turns.
 3. Choose what and where to train military units.
 - Untrained units can be formed with discarding populations and weapon units indicated in the military units table.
 - It takes one turn for the military units to be trained, untrained military units can't move until the next turn.
 4. You can choose to move and attack units
 - HP of units are HP coin under the unit, when the unit got attacked, there will be amount of HP coins removed under the military unit equivalent to the attacking unit's attack
 - Units can attack after move, but can't move after attack unless specially indicated.
 - Units can't stand in the same tile
 - Units without HP coins will be removed from the map
 - Units can attack outside of their range but in order to hit the player must succeed on a coin flip for an additional tile.
