The Cruellest Years

(Win the war & Keep people happy & Keep people alive & Not too much inflation)

Factories

Military Factory

- Military Factory product 1 weapon per turn

Industrial Factory

- Produces 10 Daily Necessities or 10 Money or 5 Daily Necessities + 5 Money per turn

Weapon

- weapon unit + population unit can be made into planes, boats, soldiers, tanks, cannons, special forces

Daily necessities

- Necessary to maintain population happiness

1 unit Daily Necessity is needed per million people

Population happiness

- 0% - Revolution
- When money goes to zero force inflation back to x points

10% population happiness decreases by running out of money / population

Turn

- 1 turn is 1 month, 120 turns

Time Range

- Start: Italy Invade Ethiopia
- 1935 - 10

- End: Japan Surrender
- 1945 - 9

Population

- 1 unit is 1 million people
- based on historical data, have natural growth / decrease based on historical trend

Treasure

- based on historical data, have natural growth / decrease based on historical trend
- Could add more money but would increase inflation

Military Units

- Amount of units stacked together would be cardboard circles below unit figure
- Different military units have different cost and time
- Could stack up to 3 in same region, Blood and Attack stacks, other doesn't

*combination ends actions

*Boats carrier same amount of troops as their fee

*Only planes and Anti-Aircraft Artilleries could hit planes

Countries / Powers

- Countries / Powers have leader ability, unique unit, and 1 unique trait

Leaders

- Leaders have unique abilities, could be active and passive

Unique Unit

- Every countries have a unique unit that is stronger than common units

National Ideology

Historical Events

- Can be / must be played by players in certain time with prerequisite conditions
